# It's the doorway to an even more productive business.

Introducing the new professional workgroup range of mono laser printers from Brother; the latest line-up designed to open up even more possibilities.

The new monolaser range offers everything you expect from a professional printer, including high quality output, print and scan speeds of up to 50ppm, superb reliability and low total cost of ownership.

It also offers something you definitely wouldn't: the ability to fit in virtually anywhere and get to work fast.

That's because the range has been developed with the flexibility to adapt to the different requirements of virtually any size workgroup, and the capability to be customised via open interface software to integrate with any type of network.

With printers this adaptable on your team, the possibilities are endless.

Optional
up to 800 sheets
capacity mailbox

1.8" colour TFT LCD

50 sheets
multi-purpose tray for
thick media / odd sizes

Optional
2,080 sheets
tower tray at
520 sheets
per tray

Stabiliser base
with wheels

Paper output with
paper stack
full sensor

520 sheets
default paper tray

Paper level indicator

HL-L6400DW

Optional accessories require additional purchase
All trays and mailbox capacity may vary with paper types

Designed to perform in every department.

We believe that technology should meet the changing needs of businesses. To help us achieve this, we've listened to what our customers want and developed new products to not just meet, but exceed their requirements.

In the new monolaser range, you'll find solutions designed to work at every level of your organisation.

More control for IT Departments

With Brother Solutions Interface (BSI) on board, the new range is built to seamlessly integrate. This allows bespoke software solutions to be easily implemented and is server-run for easy deployment across a range of devices. It also allows customisation of device user interfaces, granting full control of print, scan and other functions for complete integration.

Better economy for the Finance Department

Enterprise-level office technology is now available without the enterprise-level price tag. Near Field Communication (NFC) gives you better document security and improved user authentication for pull printing without expensive card readers. Plus, cost per page is lowered thanks to longer-lasting toner and more efficient design.

Improved business efficiency for CEOs

With fast A4 print and scan speeds of up to 50ppm, long waits for the printer become a thing of the past, and a large 12.3cm touchscreen (DCP and MFC models) featuring a more intuitive user interface helps make operation quicker and easier. While customisation options like extra paper input trays, mailbox with sort and stack functions and up to four output trays also help reduce time spent loading paper and collating output.

Excellent print quality and reliability for everyone

Of course there's no point employing a business-class print solution that doesn't deliver equally professional results. So another thing you can rely on 100% is crisp, sharp mono print quality that's amongst the best you'll find in a printer in this class – plus reliability levels that means it will be delivered day in day out, month after month.

Built to deliver at every level.

The technology included in the new range isn't just packed with features. It's loaded with benefits designed to take your organisation to the next level.

- User-friendly 12.3cm touchscreen, makes operation both intuitive and easy

- Fast Gigabit Ethernet network speed to keep data flowing

- Less time waiting for prints with output speed of up to 50ppm

- Impressive print volumes of up to 10,000 pages per month, to keep up with the busiest workgroups

- Paper input options flexible enough to adapt to the most demanding requirements, with 520 page standard tray and input sensor and optional 520 x 2 / 250 x 3 / 520 x 4 Tower Tray

- Install the optional 4 bin mailbox unit and gain additional 4 paper output trays for fast, convenient document collation

- Advance paper output options including 250 standard output tray, output sensor and optional mailbox

- Advance scan capabilities with 80 Sheet ADF, to handle up to 50ppm and up to 100ipm 2-sided scanning, to get large documents scanned fast

- Large memory up to 1GB handles multiple documents, from various users for minimum disruption to workflow

- Toner cartridges go further with up to 20k page inbox toner and optional up to 20k page ultra high yield cartridges*

Approximate cartridge yield is declared in accordance with ISO/IEC 19752

Open up even more
business opportunities
with mono lasers designed
for an even wider range
of applications.

Thinking big with Brother.

At Brother, we believe our customers' business is our business. We're dedicated to overcoming obstacles to productivity and creating new solutions to print problems to help organisations of all sizes achieve their goals.

That's why choosing us as your print partner can make a big difference all round.

Four ways the new mono laser range can help every business

Built on Brother's proven track record in mono laser printers, the range is designed to provide improvements in four key areas:

1 Reliability

The new range is built to perform, with up to 150,000 maximum monthly print volume (up to 10,000 recommended monthly volume) to meet the demands of high output workgroups. Units have also been totally remodelled to be more resilient and hardwearing to brush off the inevitable knocks and bumps of busy workspaces.

2 Productivity

With a first page out time of less than 7.5 seconds and an impressively quick print speed of up to 50ppm, working fast is second nature. They work harder too, with paper input of up to 2,650 and output capacity of up to 1,050 sheets using the optional mailbox with stacker and sorter functions.

3 Workflow

Design improvements include an 80 page auto document feeder that enables high speed 2-sided scanning straight into a document management system for less queuing and more doing. Along with a more intuitive and user-friendly interface and improved support for different media and connectors to popular cloud-based services such as Microsoft SharePoint, it's just what your workgroups have been waiting for.

4 Security

Savvy businesses should settle for nothing less than the highest levels of security. Active Directory integration, Secure Function Lock 3.0 and Internet Protocol Security (IPsec) ensure they are achieved. For added peace of mind, the range also features Print Archive, Secure Reset and Certificate Management and Near Field Communication (NFC) functionality for secure user access and authentication.

Flexible hardware, adaptable software.

Convenient paper handling options

To help your workgroup requirements and document handling needs, a choice of configuration options are available to improve paper input and output collation. These include:

Input

- Maximum paper input level of 2,650 sheets with tower tray

Output

- Mailbox assigns bins to users or groups using time-saving sorter and stacker features (up to a maximum of 1,050 sheets)

Designed to integrate

The new range has been designed to fit into any size network in any size office or workgroup to seamlessly integrate and offer:

- Open interface for maximum software customisation potential

- Ultimate connectivity thanks to cloud connectivity and Brother Solutions Interface

Total cost of ownership that's equally attractive

We've not just equipped the new range with features designed to turn heads. We've also made sure their total cost of ownership gives them an even bigger advantage over the competition.

In fact, with new Brother ultra high yield cartridges, up to 20,000 pages can be printed before replacement to keep running costs down.

At your side

Whether it's driving innovation in printer design, or providing some of the best technical support and after sales service around, it's our promise to be at your side. When it comes to warranty, you can relax knowing that you're protected by a 36-month warranty with extended warranties available if requested. And if something does go wrong, we're always here to help you put it right with expert help and support available online or by phone to get you back in business fast.
